14:00, from the hotel

Highlights

- See the twin lakes of the Sete Cidades volcanic crater of São Miguel Island
- Drive along the scenic road of the Pico do Carvão mountain
- Marvel at the unique flora of the Azores

STRONG GRAVITY UNIVERSE

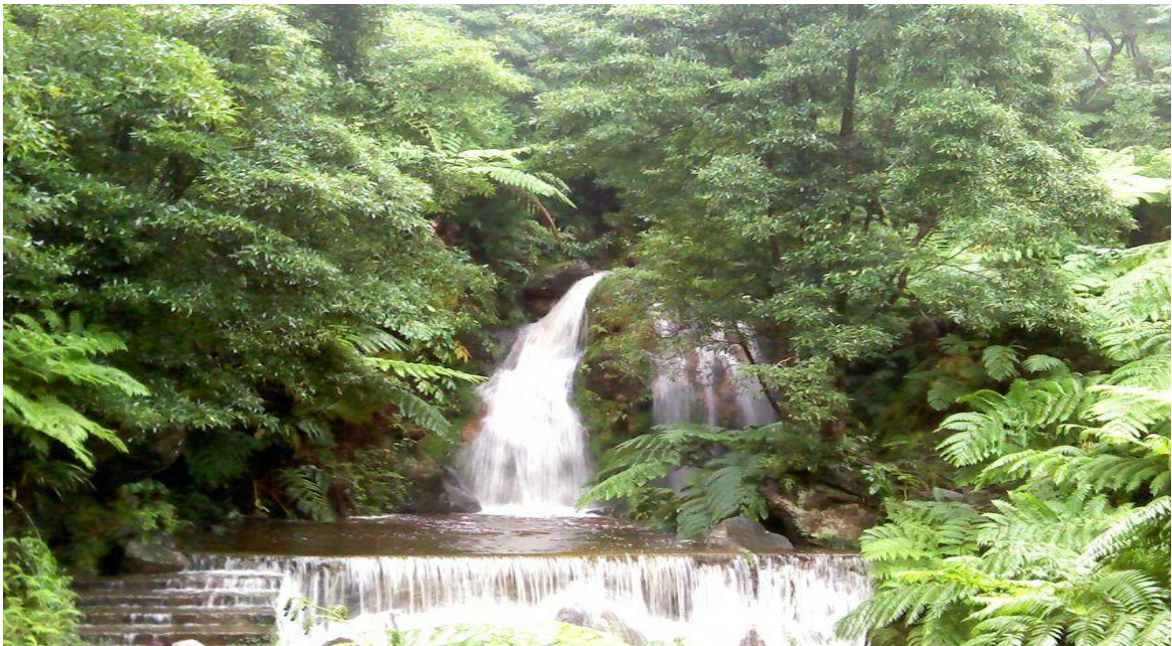

SÃO MIGUEL, JULY 3-7, 2017

Full description

Explore the volcanic landscape of the Sete Cidades, and the mountain scenery of the Lagoa do Fogo on a half-day sightseeing tour from Furnas. Following a pick-up from your hotel, drive along a scenic road to the Vista do Rei viewpoint. Enjoy panoramic views of the blue and green waters of the two lakes in the crater of the Sete Cidades.

Then, continue to different viewpoints before getting close to the banks of the twin lakes, and marvel at the unique flora of the natural park. Drive along the Pico do Carvão road past numerous small lakes, including the “Empadas Lakes.” Get multiple perspectives of the north and south shores of the island of São Miguel.

Marvel at the thermal pools, waterfalls and different types of endangered plants of the area, before your return to Furnas and a drop off at the hotel.

SÃO MIGUEL, JULY 3-7, 2017

'Caldeiras e Vulcões' Restaurant

Social dinner

20:00/20:30 (we will walk to the Restaurant)

In addition to the classic, and more well-known plate of Geothermal Cuisine - Cozido das Furnas, we will also enjoy another steamed dish, with the telluric heat, similar to what the ancients did: the steamed cod stew. Indulge in a 'queijada de inhame' for dessert, a small cupcake-like custard using locally produced coco-yam, or taro root paste as its base, or choose the sweetest local pineapple for a refreshing finish.
